

The Reimbursement Evaluation will allow us to be very specific about what BMS can do in terms of improving your reimbursement per visit and the aging of your receivables. It will help you to determine the upside potential of outsourcing. The information you send will be kept strictly confidential.

The analysis results in data benchmarking against other rehab practices and also provide areas in which to focus attention. The EOBs that you will send along with the completed RE data sheet provide a micro view of the reimbursement practice patterns. For this portion of the analysis please provide the following:

- Gross Charges by month for last six months
- Collections by month for the last six months
- Adjustments and write-offs by month for the last 6 months
- Month-End Accounts Receivable total for the last 6 months
- Visits per month for the last six months
- Total new patients per month for the last six months
- Explanations of Benefits from the last 12-months:
 - 30 Private Insurance Payer EOB's
 - 30 Workers Compensation EOB's
 - 30 Medicare EMOB's or 2 months of remittance information on Medicare patients
 - If applicable-25 Medicaid EOB's or 1 months remittance information on Medicaid patients

Reimbursement Evaluation Data Requirements Worksheet

(Last Six Months of Information)

| | | | | | | |
|-----------------------|--|--|--|--|--|--|
| Month/Year | | | | | | |
| Gross Charges* | | | | | | |
| Collections* | | | | | | |
| Adjustments* | | | | | | |
| Month End AR* | | | | | | |
| Visits* | | | | | | |
| New Patients* | | | | | | |

Please **estimate** the percentage of total patient visits from Medicare, private insurance and Workers' Comp. You need not estimate each month separately; a general estimate will be fine.

% of visits from Medicare per month = %

% of visits from private/commercial/auto per month* = %

% of visits from Workers' Comp per month = %

Aging Report: Please list dollar amount for each aging period

< 30 days: _____

31 - 60 days: _____

61 - 90 days: _____

91 - 120 days: _____

120 > days: _____

*** Do not include capitated or case rate data for this analysis**
